EDUCATION

Computer Science, Computational Cognitive Science and Math

University of Toronto, St. George

09/2021 - 06/2025

High School

Upper Canada College

09/2017 - 06/2021

WORK & VOLUNTEER EXPERIENCE

Web Dev & Research Intern

WooYourBoo

08/2022 - Present

Toronto, ON, Canada

A Toronto-based startup aiming to create strong, fun relationships and make date nights more interesting, using technology.

Achievements/Tasks

- Researched details about relationships, how people track them, and how the app can be used to improve this process
- Converted the research into a product form, both in the form of an app and a website
- Used knowledge of HTML, CSS and JavaScript to improve the current website where Squarespace couldn't

CEO, Website Developer & Designer

Autinerary Co.

06/2022 - Present

A company designated to providing Autism awareness, both for those affected and their families and for those interested in the cause

Achievements/Tasks

- Returned to the original 2020 project and completely redesigned the original Weebly website from scratch, using HTML, CSS and JavaScript
- Used the Google Maps API to create a system connecting users to the nearest caretakers and professionals
- Organized the rest of the business by creating business plans, conducting user interviews, looking for funding, finding mentors & partnerships, and hiring a blog team, among other tasks

Alumni

Google CSSI Program

07/2021 - 08/2021

Toronto, Canada

A four-week introduction from Google to computer science (CS) for rising first year college students with a passion for technology

Achievements/Tasks

- Learned to develop JavaScript applications, creating an online game to showcase skills
- Learned how to create and use websocket servers
- Networked with Google employees

Project Planning & Budgeting

OTHER EXPERIENCE & PERSONAL PROJECTS

Vector Institute - Intro to ML Program (09/2022 - Present)

- Learned about various ML topics: Nearest Neighbours, Decision Trees, Linear Regression & Classification, Optimization, Neural Networks, Supervised & Unsupervised Learning, & Recommender Systems
- Implemented ML algorithms with NumPy, SciPy & scikit-learn libraries through a capstone project & mock internship projects

IBM Data Science Prof. Certificate (06/2022 - 07/2022)

- Learned to use SQL, R, Jupyter Notebook, Python, and IBM Cloud
- Learned about Data Analysis, Visualization, and Machine Learning
- Created a capstone project to gather, clean, & analyze data, and use machine learning to predict the Falcon 9's next launch results

Doughboy (2D Platformer) (03/2021 - 06/2022)

- Created level design ideas and pixel art, made the demo from scratch
- Created music for half of the game's expected total levels
- Completing the demo of the game, available at dbdemoofficial@gmail.com
